**v.1.0**

Overview

About the project

Waxhispano is an **NFT** project on the WAX blockchain. Our goal is to reward the community with tokens and NFTs – for this we create software that revolves around our native **WAXFREN** token and the **WAXFRENS NFT** collection. Read on for details.

About WAXFRENS Brand

WAXFRENS is a pixel art collection inspired by pop culture. Each month we release a set of characters which can be staked in our **NFT farm** to earn **WAXP** every hour. In this way, we say that our collection is a **c2e** (collect to earn) collection.

Introduction

Waxhispano is a community-driven project. For this reason, we have created a **DAO** where collectors can create proposals that are then voted on by the community.

Each proposal incurs a 50 WAXP cost, which serves as a deterrent against spam. All WAXP collected through DAO proposals is allocated to the project treasury and will be used to support and advance our tools.

Tools

1. waxhispano.com is a is an **RSS** aggregator for blogs about the WAX blockchain. Here, we have created a new concept on WAX: **read to earn** or **r2e**. Users who register with the platform earn WAXFREN tokens for reading articles. These tokens accumulate in their account and can be exchanged for **NFTs**.
2. [Waxhispano Discord Bot](): Our Discord bot allows users to "dig" for tokens. Once the user has accumulated enough, they can redeem the tokens for **NFTs**.
3. Waxfrens Telegram Bot: Our Telegram bot allows users to "dig" for tokens. Once the user has accumulated enough, they can redeem the tokens for **NFTs**.
4. [NFT farms](): We have a number of **NFT farms** where collectors can stake their waxhispano NFTs and earn hourly rewards in various tokens.
5. [DAO](): The waxhispano **DAO** allows WAXFREN holders to make proposals for the project, and members can vote on these proposals. Winning proposals will be carried out within the margins of common sense and the economic possibilities of the project.
6. [Liquidity pools](): We have a number of **liquidity pools** where you can grow your savings and earn more **NFTs**.

Objectives

Our goal is to develop more tools that revolve around both the native WAXFREN token and NFT rewards. Ultimately, all tools will be connected and all token balances will be linked to a central database. This will allow users to earn tokens with one platform/tool and redeem them for NFTs on another.
Tokenomics

Ticker Name	Listing time	Contract	Website	Source Code
WAXFREN	21/03/2022 10:00PM	mc5wo.wam	--	--

Listing Tags	Fully Diluted Market Cap	Circulating Supply
--	12500050.00000 WAX ($1,898,778.50)	25000100.00000000 WAXFREN
	Market Cap	Max Supply
	12500050.00000 WAX ($474,696.52)	100000000.00000000 WAXFREN
	Volume 24h	Total Supply
	0.00000 WAX ($0.00)	100000000.00000000 WAXFREN

WAXFREN token Utility

- The main utility of the native token WAXFREN is to obtain rewards in the form of NFTs
- Our monthly drops can be purchased with WAXFREN at a discount compared to paying with WAXP
- WAXFREN can be staked in various liquidity pools
- WAXFREN will be the native token of a game currently in development

Roadmap

Our current objectives are as follows:

- Develop a Telegram bot where users can earn WAXFREN tokens and claim NFTs
- Develop a control panel for administrators where they can manage the entire project from a single place
- Develop a game for our NFTs and earn WAXFREN tokens and NFTs

These objectives may vary slightly, depending on the proposals of the community in the DAO.
